The Zone® Nailing Area & Color Selector Guide

THE ZONE® NAILING AREA

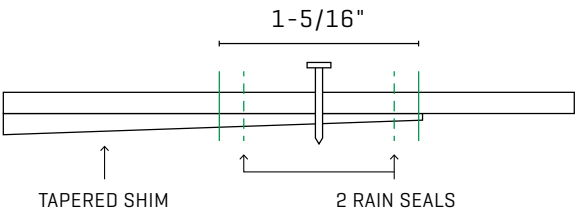

An average roof requires thousands of properly placed nails. The Zone®, Malarkey’s patented wider nailing area and common bond overlap on architectural shingles, helps ensure that every nail hits and penetrates both shingle layers for maximum protection from nail pull-out and shingle uplift, while double rain seals add extra protection from wind-driven rain.

Our tapered shim (backing layer) helps the shingle lay flat and shed water without interruption. Standard shingles leave a ridge that can create *troughing*, allowing water to run sideways under shingles and then down a misplaced nail, resulting in leaks.

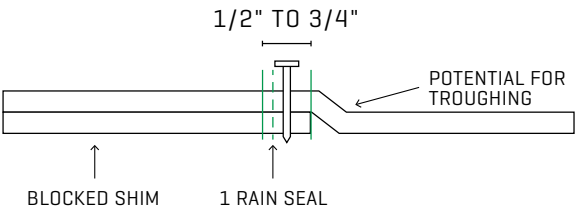

Malarkey Shingle Nailing Area - [1-5/16" wide, 2 rain seals]

MALARKEY SHINGLE NAILING AREA

STANDARD SHINGLE NAILING AREA

Standard Shingle Nailing Area - [1/2" to 3/4" wide, 1 rain seal]
