The Zone® Nailing Area & Color Selector Guide

Shown in Highlander® NEX® - Natural Wood
THE ZONE® NAILING AREA

An average roof requires thousands of properly placed nails. The Zone®, Malarkey's patented wider nailing area and common bond overlap on architectural shingles, helps ensure that every nail hits and penetrates both shingle layers for maximum protection from nail pull-out and shingle uplift, while double rain seals add extra protection from wind-driven rain.

Our tapered shim (backing layer) helps the shingle lay flat and shed water without interruption. Standard shingles leave a ridge that can create troughing, allowing water to run sideways under shingles and then down a misplaced nail, resulting in leaks.

Malarkey Shingle Nailing Area - (1-5/16" wide, 2 rain seals)

Standard Shingle Nailing Area - (1/2" to 3/4" wide, 1 rain seal)
The Colors

Please refer to sales sheet for most updated color availability in your region.

Disclaimer:
Photographs of shingles may not accurately represent their true color or the variations of color blends that will appear on the roof. Before installation, five or six shingles should be laid out and reviewed for desired color. Colors and specifications subject to change without notice. Shingle colors not available in all regions or product lines.

Please Reuse: Please return this display to your contractor when finished. Thank you!

Matching colors available in high-profile EZ-Ridge™ and EZ-Ridge™ XT as well as standard low-profile RidgeFlex™ hip and ridge shingles.
