- Used w/non-fibered PMMA resin as reinforcement
- EZ Seal membranes are monolithic, flexible and seamless
- Ideal for access-restricted areas and difficult waterproofing conditions

EZ SEAL FLEECE**PRODUCT USE**

EZ Seal Fleece is used to improve tear strength, puncture resistance and crack-bridging capabilities of EZ Seal Non-Fibered PMMA Resin while maintaining membrane uniformity. Malarkey Roofing Products® EZ Seal System is waterproof, flexible, self-adhering, and ideal for access-restricted and difficult waterproofing conditions. EZ Seal conforms and bonds directly to the substrate and penetrations, eliminates the need for caulk and pitch pans, and is virtually maintenance-free.

COMPOSITION & MATERIALS

EZ Seal Fleece is a non-woven, chopped strand, fabric reinforcement and used with EZ Seal Non-Fibered PMMA Resin, Standard (760). EZ Seal Fleece is available in 14-inch widths.

APPLICATION/INSTALLATION

EZ Seal Fleece is used with EZ Seal Non-Fibered PMMA Resin. Apply to substrates prepared as specified in the EZ Seal Application Instructions. Allow a 2" (51 mm) overlap at side laps, 4" (102 mm) at end laps, 4" (102 mm) at all flashings, and 5% for waste. Contact Malarkey's Technical Services Department for details.

PRECAUTIONS

Always store rolls of EZ Seal Fleece upright in a cool and dry location. Do not store flat as this deforms the rolls and creases the fabric. Shelf life is indefinite with proper storage. Refer to product SDS prior to use or handling, but EZ Seal Fleece requires no special measures and may be disposed of in standard landfills. Products used with EZ Seal Fleece may be flammable or explosive.
