## TEST COMPLIANCE

ASTM D7158 CLASS H

ASTM D3462 ASTM D3161 CLASS F

ASTM D3018 TYPE I

ASTM E108 CLASS A FIRE RATING

UL 2218 CLASS 4 CSA A123.5

ICC APPROVAL – ESR-3150

ICC-ES AC438

FBC APPROVAL – #14809

See page 2 for solar reflectance technical data.

## FEATURES &amp; BENEFITS

- Sustainable NEX® asphalt technology
- Extreme weather protection
- Larger nailing area of The Zone®
- Double rain seal protection
- 3M™ Smog-Reducing Granules
- UL 2218 Class 4 impact resistance

\* CRRC and California Energy Code Title 24, Part 6 only applies to Vista® Sienna Blend and Silverwood shingles.

Effective 01/26  
Supersedes all previously published data.

VISTA®  
NEX® Polymer Modified Architectural Shingles

## PRODUCT USE

251 Vista® is a laminated architectural shingle fortified with sustainable NEX® polymer modified asphalt technology for enhanced granule adhesion and increased weather protection. Vista® features the patented, nailing accuracy design of The Zone® which dramatically improves correct fastener placement. Vista® Sienna Blend and Silverwood shingles are CRRC-listed and can be used to comply with California Energy Code Title 24 Part 6 and Los Angeles County, California Title 31 Cool Roof Requirements. Please consult Malarkey's Technical Services Department for approval of roof systems.

## COMPOSITION &amp; MATERIALS

Vista® is manufactured on a non-woven fiberglass mat and impregnated on both sides with NEX® polymer modified bitumen (asphalt) that is compounded with a fire-retardant mineral stabilizer. Its surface incorporates an innovative combination of ceramic granules that provide varied color, weatherability, even smog reduction; other granules increase energy efficiency by adding solar reflectivity.

## APPLICATION

Shingles should be applied over a Malarkey underlayment or an approved, code-compliant substitute. Installation instructions are available on the shingle wrapper by scanning the corresponding Quick Response (QR) code, on our website at [WWW.MALARKEYROOFING.COM](http://WWW.MALARKEYROOFING.COM), or by contacting your local Malarkey representative. Industry standards are found in NRCA manuals. Shingles should be attached to decking with approved fasteners, i.e., corrosion-resistant nails, for this purpose. Staples are not allowed.

## PRECAUTION

For best results, Malarkey recommends Vista® be protected from the weather and stored in a cool, dry, well-ventilated area until applied. Do not use on roofs where the slope is less than 2:12 [2" [51 mm] per 12" [305 mm]]. For slopes 2:12 up to 4:12 [4" [102 mm] per 12" [305 mm]], a double layer of underlayment is required [IBC & IRC have an exception for a single layer of ASTM D1970 underlayment in lieu of a double layer]. Vista® has a factory-applied, self-sealing strip that activates in warm weather. When applied in cold weather or windy locations, hand-sealing is recommended but not required if sealant activates. On slopes greater than 21" [533 mm] per 12" [305 mm], hand-sealing underneath and six nails are required. Contact Malarkey for further conditions and instructions.

## WARRANTY

Malarkey Roofing Products® offers various warranties to meet specific requirements. The warranty packages available for Vista® include a Limited Lifetime Warranty, a 110 mph [177 kph] Limited Wind Warranty, and can be combined with other Malarkey products for a 130 mph [209 kph] Enhanced Wind Warranty. Contact your roofer, local distribution center, or Malarkey for full details. See below for TECHNICAL ASSISTANCE contact information.

Vista® and other Malarkey products are available throughout North America and Pacific Rim countries.

## SOLAR REFLECTANCE TECHNICAL DATA

Vista® Sienna Blend and Silverwood are listed with the Cool Roof Rating Council.

Vista® Sienna Blend and Silverwood have tested to these radiative property values:

Cool Roof Rating Council ratings are determined for a fixed set of conditions, and may not be appropriate for determining seasonal energy performance. The actual effect of solar reflectance and thermal emittance on building performance may vary.

Manufacturer of product stipulates that these ratings were determined in accordance with the applicable Cool Roof Rating Council procedures.
