

Why Malarkey Shingles?

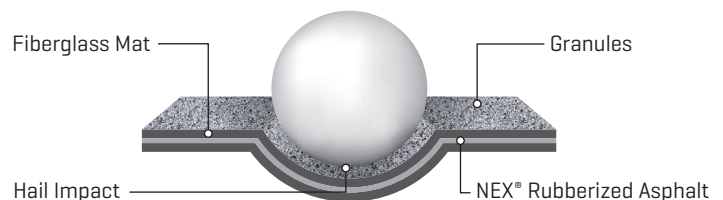

100% OF ALL MALARKEY SHINGLES are made with NEX[®] Polymer Modified (Rubberized) Asphalt which provides for the highest granule retention, impact resistance, and cold weather installation.

NEX[®] Rubberized Asphalt is a more rubberlike material to better grip granules and better absorb and deflect hail impact without damage.

UL 2218 Class 3 Impact Rating	UL 2218 Class 4 Impact Rating	UL 2218 Class 4 Impact Rating Heavier Weight

WHAT DO THE UL 2218 CLASS 3 AND 4 RATINGS MEAN?

- 1.75-inch steel ball dropped 12 times from 17 ft. on a shingle assembly with no crack on the back achieves Class 3
- 2-inch steel ball dropped 12 times from 20 ft. on a shingle assembly with no crack on the back achieves Class 4

WHY WOULD YOUR CUSTOMER WANT A MALARKEY ROOF?

- Longer shingle life due to 65% better granule retention
- Class 3 and 4 Rated shingles resist Indiana hailstorms
- Most insurance companies offer 5-15% discounts
- Heavier duty shingle engineered for longer life
- Best for the environment: upcycled polymers in asphalt provides significant landfill reduction, while smog-reducing granules clean the air

Malarkey...The Industry's most sustainable, higher performance roof shingle on the market that provides exceptional value!
